

# JOSEPH JACKSON

joseph.jackson@jackson.dev · 4554778487 · Welchshire, Netherlands  
<https://github.com/josephjackson> · <https://linkedin.com/in/joseph-jackson>

## RESEARCH INTERESTS

---

Mid-level backend engineering specialist with 2 years building production systems. Skilled in Go, Python, LangChain with focus on performance optimization and code quality.

## EDUCATION

---

|                                 |      |
|---------------------------------|------|
| <b>TU Delft</b>                 | 2021 |
| M.Tech. in Software Engineering |      |
| <b>TU Munich</b>                | 2021 |
| B.A. in Mathematics, GPA: 3.47  |      |

## PROFESSIONAL EXPERIENCE

---

|                                                                                               |            |                   |
|-----------------------------------------------------------------------------------------------|------------|-------------------|
| <b>Backend Developer</b>                                                                      | , Supabase | 2023-11 – Present |
| Led migration from monolithic to microservices using GCP, improving system scalability by 40% |            |                   |
| Optimized database queries using Kafka, improving query performance by 69%                    |            |                   |

## TECHNICAL PROFICIENCIES

---

Go, Python, LangChain, Actix, NestJS, Flask, ASP.NET, Cassandra, SQLite, DynamoDB, GitHub Actions, RabbitMQ, Kubernetes, Heroku, Fly.io, GCP, AWS, Anthropic, Replicate, Agile, LLM Integration, Scrum, CI/CD

## SELECTED PROJECTS

---

**Health Check Service** [Go, Python, Flask] — Created gRPC Services leveraging Go for core functionality and Python for optimization

**Config Manager** [Go, Python, Flask] — Created Data Sync Platform leveraging Go for core functionality and Python for optimization
