SUMMARY

Senior backend engineering engineer with 6 years of experience architecting and delivering enterprise solutions. Expert in Rust, Ruby, TypeScript with demonstrated leadership in cross-functional teams.

WORK EXPERIENCE

Backend Developer

2021-09 — Present

Twilio (full-time)

Reduced infrastructure costs by 58% through optimization using Kafka
Built event-driven architecture using Replicate, processing 5000+ events daily
Implemented caching layer with Kafka, reducing database load by 70%

Platform Engineer

2019-08 — 2021-03

Anthropic (internship)

Built event-driven architecture using Event-Driven Architecture, processing 10000+ events daily
Optimized database queries using Event-Driven Architecture, improving query performance by 15%
Created authentication and authorization system using Helm, securing 50000+ user accounts

EDUCATION

Ph.D. in Mathematics

2018

TU Delft — GPA: 3.79

SKILLS

Rust, Ruby, TypeScript, LlamaIndex, Flask, Django, MongoDB, CockroachDB, MySQL, Cassandra, Neon, Git, Helm, Kafka, Docker, ArgoCD, Cloudflare, Render, AWS Bedrock, OpenAI API, TDD, GraphQL, CI/CD

PROJECTS

Code Review Bot *(TypeScript, Ruby, Flask)*

Designed and implemented Database Proxy with Ruby, integrating with Flask for seamless data flow

Schema Validator *(Ruby, Django, LlamaIndex)*

Built Notification Service using Ruby and LlamaIndex, enabling automated processing and improving efficiency by 40%

CERTIFICATIONS

AWS Certified Developer Associate — Amazon Web Services (2025)

ADDITIONAL

Spoken_language: Turkish (Native)

Personal_statement: Passionate about developer tools and building technology that makes a difference.

Award: Innovation Award — Company Internal 2021
