

Stephanie Mahoney

Backend Engineering | Fresher | Lake Anthony, Singapore

stephanie.mahoney@outlook.com | 523-512-2099x499 | <https://linkedin.com/in/stephanie-mahoney>

About Me

Lead backend engineering professional with 9 years driving technical strategy and team excellence. Expert in Node.js, PHP, LlamaIndex with track record of building and scaling engineering teams.

Education

Ph.D. in Electrical Engineering NUS — GPA: 3.89	2015
M.Tech. in Data Science Technion — GPA: 3.81	2014

Skills

Node.js	PHP	LlamaIndex	Flask	Spring Boot	FastAPI	Cassandra	SQLite	Redis	DynamoDB
PostgreSQL	Nginx	Ansible	Git	Terraform	DigitalOcean	Cloudflare	Fly.io	Vercel	Replicate
Anthropic	AWS Bedrock	OpenAI API	REST API Design	CI/CD	RAG Architecture	Scrum			

Internships / Experience

API Developer at Figma (2022-07 – Present) Designed and implemented message queue system using FastAPI, processing 100000+ messages/hour Reduced infrastructure costs by 16% through optimization using RAG Architecture
Server-Side Developer at DeployFast (2019-10 – 2022-03) Built event-driven architecture using RabbitMQ, processing 500+ events daily Designed and implemented message queue system using Redis, processing 100+ messages/hour
AI Engineer at Uber (2018-09 – 2019-08) Developed real-time data processing pipeline using Claude API, handling 10000+ logs/second Led migration from monolithic to microservices using Spring Boot, improving system scalability by 33% Architected and built RESTful APIs serving 100000+ requests/day using Spring Boot, reducing response time by 57% Designed and implemented microservices architecture using Gin, handling 100+ concurrent users
AI Engineer at CodeCraft Studios (2016-01 – 2018-04) Designed and implemented microservices architecture using Azure OpenAI, handling 500+ concurrent users Led migration from monolithic to microservices using Cassandra, improving system scalability by 20% Led migration from monolithic to microservices using Azure OpenAI, improving system scalability by 68% Designed and implemented microservices architecture using CockroachDB, handling 1000+ concurrent users
