RESEARCH INTERESTS

Senior backend engineering engineer with 6 years of experience architecting and delivering enterprise solutions. Expert in Python, Go, Spring Boot with demonstrated leadership in cross-functional teams.

EDUCATION

UT Austin B.Eng. in Computer Science, GPA: 3.43	2018
McGill University M.Tech. in Computer Science	2020

PROFESSIONAL EXPERIENCE

LLM Engineer Designed and implemented message queue system using Neon, processing 50000+ messages/hour Implemented caching layer with FastAPI, reducing database load by 42% Implemented caching layer with Neon, reducing database load by 55% Mentored team of 4 junior developers on FastAPI best practices	, Twilio	2025-03 – Present
LLM Engineer Mentored team of 2 junior developers on Git best practices Built automated CI/CD pipelines with Cassandra, reducing deployment time by 66%	, PromptStack	2020-11 – 2024-12
API Developer Led migration from monolithic to microservices using DigitalOcean, improving system scalability by 28% Designed and implemented microservices architecture using Google Gemini, handling 500+ concurrent users Built event-driven architecture using Google Gemini, processing 50000+ events daily Developed real-time data processing pipeline using DigitalOcean, handling 100+ records/second	, TechFlow AI	2019-12 – 2020-10

TECHNICAL PROFICIENCIES

Python, Go, Spring Boot, LangChain, FastAPI, Supabase, SQLite, CockroachDB, gRPC, Docker, Ansible, AWS, GCP, Claude API, Azure OpenAI, RAG Architecture, TDD, Microservices, REST API Design, Event-Driven Architecture

SELECTED PROJECTS

Health Check Service [LangChain, FastAPI, Python] — Built Microservices Platform with LangChain and FastAPI, serving 10,000+ daily active users
Config Manager [Go, FastAPI, Spring Boot] — Created Payment Processing System leveraging Spring Boot for core functionality and Go for optimization
