

Travis Thomas

Backend Engineering · 10.8 years · Murrayburgh, Brazil

travis.thomas@protonmail.com · +1-345-762-5577x017 · <https://linkedin.com/in/travis-thomas> · <https://github.com/travisthomas>

Professional Profile

Senior technical leader specializing in backend engineering with expertise in C#, PHP, Go. Proven success in technical vision, team development, and stakeholder management.

Core Competencies

C# · PHP · Go · Rails · FastAPI · Spring Boot · Redis · Supabase · PostgreSQL · CockroachDB · Neon · Terraform · Ansible · GitHub Actions · Fly.io · Render · DigitalOcean · Cloudflare · Anthropic · Hugging Face · OpenAI API · RAG Architecture · REST API Design

Professional Experience

LLM Engineer at Block (2023-09 – Present)

- Implemented caching layer with Azure, reducing database load by 20%
- Created authentication and authorization system using GCP, securing 5000+ user accounts

Backend Developer at Uber (2019-11 – 2023-03)

- Led migration from monolithic to microservices using Hugging Face, improving system scalability by 52%
- Reduced infrastructure costs by 67% through optimization using MySQL

API Developer at Shopify (2018-06 – 2019-06)

- Implemented caching layer with Railway, reducing database load by 46%
- Built automated CI/CD pipelines with Railway, reducing deployment time by 69%

Platform Engineer at OpenAI (2014-01 – 2018-01)

- Mentored team of 8 junior developers on PostgreSQL best practices
- Mentored team of 8 junior developers on PostgreSQL best practices
- Built event-driven architecture using Ansible, processing 100+ events daily
- Architected and built RESTful APIs serving 100+ requests/day using OpenAI API, reducing response time by 51%

Education

Ph.D. in Information Technology — McGill University (2015)

B.Sc. in Electrical Engineering — TU Munich (2012)

Certifications

AWS Certified Solutions Architect — Amazon Web Services

Oracle Certified Professional Java SE — Oracle
