About Me

Senior technical leader specializing in backend engineering with expertise in Java, TypeScript, C#. Proven success in technical vision, team development, and stakeholder management.

Education

B.A. in Mathematics	2014
Carnegie Mellon University — GPA: 3.78	
API Design Competition	
M.Eng. in Cybersecurity	2016
Tsinghua University — GPA: 2.88	
Research Assistant	

Projects

ML Model Registry (2021)
Designed Notification Service leveraging Java microservices architecture with Actix for caching
Tech: Java, Actix, TypeScript

Skills

Java	TypeScript	C#	Actix	LangChain	FastAPI	LlamaIndex	Supabase	SQLite	Cassandra
Git	RabbitMQ	Jenkins	Helm	Fly.io	Cloudflare	DigitalOcean	Railway	AWS	Google Gemini
OpenAI API	Claude API	Replicate	Agile	RAG Architecture	Scrum	Microservices			

Internships / Experience

LLM Engineer at Google (2022-10 – Present)
Built event-driven architecture using Replicate, processing 10000+ events daily
Optimized database queries using Replicate, improving query performance by 58%
Optimized database queries using LlamaIndex, improving query performance by 16%
Implemented caching layer with Go, reducing database load by 28%

Backend Developer at Cloudflare (2019-09 – 2022-10)
Built event-driven architecture using Gin, processing 10000+ events daily
Developed real-time data processing pipeline using Ruby, handling 10000+ logs/second

Software Engineer at PipelineIO (2016-05 – 2019-05)
Built event-driven architecture using Express.js, processing 500+ events daily
Mentored team of 7 junior developers on Event-Driven Architecture best practices
Designed and implemented message queue system using Go, processing 500+ messages/hour
