SUMMARY

Senior technical leader specializing in devops / sre / mlops with expertise in Go, PowerShell, Rust. Proven success in technical vision, team development, and stakeholder management.

WORK EXPERIENCE

MLOps Engineer 2024-03 — Present

Block (contract)

- Created monitoring and alerting system using PagerDuty, reducing MTTR by 53%
- Built disaster recovery solution using PagerDuty, achieving RTO of 147ms
- Established GitOps workflows using GitHub Actions, improving deployment frequency by 60%
- Designed and implemented infrastructure as code using Chaos Engineering, managing 100+ servers

Release Engineer 2021-06 — 2023-10

Uber (full-time)

- Built disaster recovery solution using VictoriaMetrics, achieving RTO of 104ms
- Established chaos engineering practices using PowerShell, improving system resilience
- Optimized cloud infrastructure using VictoriaMetrics, reducing costs by 30%
- Optimized cloud infrastructure using VictoriaMetrics, reducing costs by 38%

MLOps Engineer 2019-02 — 2020-12

CloudNova (internship)

- Optimized cloud infrastructure using TensorFlow Serving, reducing costs by 36%
- Implemented log aggregation using TensorFlow Serving, processing 50000+ logs/day
- Implemented container orchestration using TensorFlow Serving, managing 500+ containers

DevOps Engineer 2017-08 — 2019-01

SkillBridge (full-time)

- Optimized cloud infrastructure using Rust, reducing costs by 37%
- Built disaster recovery solution using Triton Inference Server, achieving RTO of 121ms
- Implemented log aggregation using Triton Inference Server, processing 5000+ logs/day
- Built disaster recovery solution using Rust, achieving RTO of 52ms

Cloud Engineer 2016-06 — 2017-02

PipelineIO (full-time)

- Implemented security scanning using Alibaba Cloud, identifying 100000+ vulnerabilities
- Implemented security scanning using Alibaba Cloud, identifying 10000+ vulnerabilities
- Established GitOps workflows using Buildah, improving deployment frequency by 44%
- Built CI/CD pipelines using Bash, reducing deployment time from 2s to 98ms

EDUCATION

M.Sc. in Mathematics 2018

Carnegie Mellon University — GPA: 3.45

B.Sc. in Software Engineering 2014

TU Munich

SKILLS

Go, PowerShell, Rust, HCL, CDK, Crossplane, Helm, ArgoCD, CloudFormation, Skopeo, Podman, Linkerd, Azure DevOps, Jenkins, Argo Workflows, CircleCI, Tekton, Prometheus, Grafana, ELK Stack, Alibaba Cloud, Hetzner, Azure, AWS, Kale, Seldon, Triton Inference Server, Kubeflow, MLflow, Infrastructure as Code, SRE Practices

PROJECTS

ChatBot Framework (*PowerShell, HCL, Go*)

Designed and implemented Auto-scaling Solution with HCL, integrating with Go for seamless data flow

ADDITIONAL

Personal_statement: Passionate about AI ethics and building technology that makes a difference.

Hobby: Playing guitar

Award: Outstanding Contributor — Google DevFest 2024
