Education

M.Eng. in Mathematics University of Melbourne — GPA: 3.97 <i>Entrepreneurship Club</i>	2017
B.Tech. in Computer Science Imperial College London — GPA: 3.11 <i>Dean's List</i>	2015

Projects

Schema Validator (2019) Designed Customer Feedback System leveraging Roadmunk microservices architecture with Aha! for caching Tech: Roadmunk, Aha!, SQL
ChatBot Framework (2022) Built Stakeholder Reporting with SQL and Python, serving 10,000+ daily active users Tech: Python, SQL, Notion
Config Manager (2021) Implemented Product Backlog using Notion, achieving 99.9% uptime and handling 50k+ requests daily Tech: Aha!, Notion, Python

Skills

R	Python	SQL	Roadmunk	Aha!	Notion	Jira	Productboard	Mixpanel	Miro	Figma
PostgreSQL	Snowflake	MySQL	Azure	AWS	Product Discovery	Scrum	Agile			

Internships / Experience

Technical PM at NeuroLink Labs (2025-04 – Present) Created product documentation using Roadmap Planning, serving 100+ stakeholders Led product development using Roadmap Planning, launching features used by 50000+ users
Product Manager at AgentForge (2024-01 – 2025-03) Conducted user research using OKRs, interviewing 500+ users Led agile product development using Figma, delivering 100000+ sprints Led product launches using Python, achieving 100000+ signups Developed OKR tracking using Confluence, achieving 16% of quarterly goals

Product Owner at Nvidia (2020-03 – 2023-10)

Created product backlog using Figma, managing 100000+ user stories

Developed OKR tracking using Miro, achieving 20% of quarterly goals

VP of Product at Block (2015-09 – 2019-09)

Built customer feedback system using Mixpanel, collecting 100+ insights

Implemented user onboarding using R, improving retention by 32%

Developed product roadmap using R, prioritizing 100000+ features

Implemented product analytics using MySQL, tracking 1000+ metrics
