

# Christopher Holt

Backend Engineering — Michelleside, Brazil

christopher.holt@gmail.com · +1-327-391-4560x833 · <https://linkedin.com/in/christopher-holt> · <https://github.com/christopherholt>

## Profile

---

Senior technical leader specializing in backend engineering with expertise in Kotlin, Rust, Go. Proven success in technical vision, team development, and stakeholder management.

## Experience

---

**Backend Developer** at Cloudflare 2025-07 – Present

Optimized database queries using Node.js, improving query performance by 31%  
Architected and built RESTful APIs serving 5000+ requests/day using Node.js, reducing response time by 42%

**AI Engineer** at DeployFast 2023-10 – 2025-01

Built event-driven architecture using Hugging Face, processing 50000+ events daily  
Led migration from monolithic to microservices using Hugging Face, improving system scalability by 37%  
Led migration from monolithic to microservices using ArgoCD, improving system scalability by 20%  
Created authentication and authorization system using GraphQL, securing 5000+ user accounts

**AI Engineer** at Block 2020-09 – 2023-04

Developed real-time data processing pipeline using Railway, handling 10000+ queries/second  
Mentored team of 3 junior developers on Railway best practices  
Designed and implemented message queue system using NestJS, processing 500+ messages/hour  
Created authentication and authorization system using Railway, securing 100+ user accounts

**Software Engineer** at Quantum Edge 2017-11 – 2020-06

Architected and built RESTful APIs serving 100+ requests/day using Gin, reducing response time by 21%  
Created authentication and authorization system using ASP.NET, securing 100+ user accounts

**Software Engineer** at Tesla 2013-10 – 2017-07

Led migration from monolithic to microservices using SQLite, improving system scalability by 32%  
Built event-driven architecture using Kotlin, processing 5000+ events daily  
Built event-driven architecture using Rust, processing 50000+ events daily  
Led migration from monolithic to microservices using Rust, improving system scalability by 46%

## Education

---

**Ph.D., Data Science** 2015  
Technion

## Technical Skills

---

Kotlin, Rust, Go, Python, LlamaIndex, Django, PostgreSQL, Elasticsearch, Jenkins, Kubernetes, ArgoCD, DigitalOcean, Railway, Heroku, Fly.io, AWS, AWS Bedrock, Anthropic, Agile, LLM Integration

## Projects

---

**Resume Parser** — Created Database Proxy leveraging Go for core functionality and Rust for optimization

**SmartCache** — Built Cache Layer using LlamaIndex and Go, enabling automated processing and improving efficiency by 40%

## Certifications

---

AWS Certified Solutions Architect (Amazon Web Services, 2019)

## Other

---

Award: Best Paper Award — IEEE 2021
