

Lindsey Clarke

Data Science / ML / AI | Fresher | Lake Ronniebury, UAE

lindsey.clarke@clarke.dev | +1-992-698-3168x7397 | <https://linkedin.com/in/lindsey-clarke>

About Me

Seasoned software professional with deep expertise in SQL, Go, and Python. 7 years of experience delivering mission-critical systems.

Education

Ph.D. in Mathematics

2016

Georgia Tech — GPA: 3.55

Research Assistant - ML Lab

Projects

Schema Validator (2021)

Implemented ML Model Training Pipeline using SQL, achieving 99.9% uptime and handling 50k+ requests daily
Tech: Go, Python, SQL

API Gateway (2021)

Built Predictive Analytics Platform with SQL and Python, serving 10,000+ daily active users
Tech: SQL, Go, Python

Token Bucket Limiter (2024)

Developed ML Model Training Pipeline using SQL, reducing processing time by 60% through algorithmic improvements
Tech: Python, Go, SQL

Skills

- SQL
- Go
- Python
- TensorFlow
- OpenCV
- Hugging Face
- Keras
- Dagster
- Spark
- Neptune
- Polars
- Kubeflow
- Snowflake
- Pinecone
- Neo4j
- MongoDB
- Hugging Face Endpoints
- Lambda Labs
- Bedrock
- GCP Vertex AI
- Databricks
- Prompt Engineering
- MLOps
- Statistical Modeling
- NLP

Internships / Experience

Data Analyst at TechFlow AI (2025-07 – Present)

Created recommendation system using Hugging Face Endpoints, increasing user engagement by 69%
Built ML model serving infrastructure using AWS SageMaker, handling 10000+ predictions/day
Developed computer vision models using AWS SageMaker, achieving 23% accuracy
Established MLOps practices using Hugging Face Endpoints, reducing model deployment time by 22%

AI Product Engineer at Shopify (2022-01 – 2025-02)

Developed computer vision models using Snowflake, achieving 25% accuracy
Built end-to-end ML pipeline using Airflow, processing 100+ samples daily
Designed data warehousing solution using LLM Evaluation, enabling analytics on 10000+ records

NLP Engineer at Uber (2018-07 – 2022-01)

Created feature engineering pipeline using LightGBM, reducing preprocessing time by 58%

Developed computer vision models using OpenAI API, achieving 66% accuracy

Created feature engineering pipeline using DVC, reducing preprocessing time by 29%

Created recommendation system using RAG, increasing user engagement by 16%
