

Alison Butler

Principal Backend Engineering | 12.2+ Years Experience

alison.butler@gmail.com | +1-782-875-6704x31038 | Dianamouth, USA

Executive Summary

Distinguished technologist with 12 years shaping backend engineering practice. Deep expertise in Kotlin, TypeScript, Rust and proven ability to influence C-level decisions.

Leadership Experience

Platform Engineer 2022-06 – Present

Notion

Developed real-time data processing pipeline using OpenAI API, handling 100+ records/second
Created authentication and authorization system using DynamoDB, securing 500+ user accounts

LLM Engineer 2017-11 – 2021-12

Quantum Edge

Mentored team of 4 junior developers on Helm best practices
Created authentication and authorization system using Docker, securing 100000+ user accounts
Mentored team of 2 junior developers on AWS best practices

Platform Engineer 2016-09 – 2017-07

Confluent

Mentored team of 5 junior developers on Docker best practices
Developed real-time data processing pipeline using Vercel, handling 500+ records/second
Built automated CI/CD pipelines with Fly.io, reducing deployment time by 59%

Platform Engineer 2012-10 – 2016-04

TechFlow AI

Built event-driven architecture using Event-Driven Architecture, processing 100+ events daily
Led migration from monolithic to microservices using AWS Bedrock, improving system scalability by 57%
Reduced infrastructure costs by 38% through optimization using PlanetScale

Education

M.Tech. in Computer Science — Tsinghua University, 2012

Key Skills

Kotlin | TypeScript | Rust | Actix | Django | Cassandra | PlanetScale | CockroachDB | MySQL | Helm | RabbitMQ
| Kubernetes | gRPC | Git | AWS | DigitalOcean | Azure | Claude API | AWS Bedrock | RAG Architecture | Agile |
REST API Design | Scrum
