

Jennifer Lewis

Data Science / ML / AI · 11.1 years · Williamfurt, Canada

jennifer.lewis@gmail.com · (269)241-1800x5375 · <https://linkedin.com/in/jennifer-lewis> · <https://github.com/jenniferlewis>

Professional Profile

Lead data science / ml / ai professional with 11 years driving technical strategy and team excellence. Expert in Python, SQL, Scala with track record of building and scaling engineering teams.

Core Competencies

Python · SQL · Scala · Julia · Keras · LlamaIndex · XGBoost · Scikit-learn · LangChain · Weights & Biases · DVC · PostgreSQL · Snowflake · MongoDB · Qdrant · BigQuery · Azure ML · Databricks · Hugging Face Endpoints · Bedrock · GCP Vertex AI · Vector Databases · Computer Vision · Prompt Engineering · NLP · A/B Testing

Professional Experience

Data Scientist at Palantir (2023-03 – Present)

- Implemented A/B testing framework using Pinecone, running 50000+ experiments
- Built ML model serving infrastructure using Pinecone, handling 5000+ predictions/day
- Built ML model serving infrastructure using AWS SageMaker, handling 500+ predictions/day
- Developed data visualization tools using AWS SageMaker, used by 100000+ analysts

Research Scientist at InfraCore (2019-02 – 2023-02)

- Built end-to-end ML pipeline using LightGBM, processing 100000+ samples daily
- Designed data warehousing solution using AWS SageMaker, enabling analytics on 50000+ records
- Built real-time analytics dashboard using AWS SageMaker, used by 1000+ stakeholders

Data Scientist at Block (2014-10 – 2018-11)

- Developed computer vision models using Dagster, achieving 45% accuracy
- Developed computer vision models using Dagster, achieving 69% accuracy

Education

B.Eng. in Computer Science — McGill University (2013)

Certifications

TensorFlow Developer Certificate — Google
