About Me

Senior backend engineering engineer with 5 years of experience architecting and delivering enterprise solutions. Expert in Java, C#, FastAPI with demonstrated leadership in cross-functional teams.

Education

M.Eng. in Artificial Intelligence2018

UIUC — GPA: 3.65

Teaching Assistant

Projects

API Gateway (2025)

Implemented Payment Processing System using FastAPI, achieving 99.9% uptime and handling 50k+ requests daily

Tech: FastAPI, Actix, Java

Task Scheduler (2023)

Implemented File Processing Service using LangChain, achieving 99.9% uptime and handling 50k+ requests daily

Tech: LangChain, Actix, C#

Internships / Experience

Server-Side Developer at Apple (2025-09 – Present)

Created authentication and authorization system using Replicate, securing 100000+ user accounts

Designed and implemented message queue system using Node.js, processing 10000+ messages/hour

Architected and built RESTful APIs serving 100000+ requests/day using GCP, reducing response time by 39%

Platform Engineer at Confluent (2023-09 – 2025-08)

Led migration from monolithic to microservices using Google Gemini, improving system scalability by 47%

Implemented caching layer with Google Gemini, reducing database load by 69%

Mentored team of 3 junior developers on Cloudflare best practices

Server-Side Developer at Amazon (2020-12 – 2023-07)

Reduced infrastructure costs by 58% through optimization using GraphQL

Led migration from monolithic to microservices using GraphQL, improving system scalability by 68%

Developed real-time data processing pipeline using Heroku, handling 500+ queries/second

Certifications

AWS Certified Developer Associate — Amazon Web Services
