

NICHOLAS NAVARRO

nicholas.navarro@navarro.dev · 001-823-304-5018 · Scottbury, Japan
<https://github.com/nicholasnavarro>

RESEARCH INTERESTS

Distinguished technologist with 16 years shaping cybersecurity practice. Deep expertise in PowerShell, Python, Bash and proven ability to influence C-level decisions.

EDUCATION

McGill University 2007
M.Sc. in Artificial Intelligence, GPA: 3.30

PROFESSIONAL EXPERIENCE

AppSec Engineer	, Google	2022-01 – Present
Built incident response automation using SOC2 Compliance, reducing recovery time by 69%		
Developed threat intelligence platform using Python, tracking 5000+ threats		
Created security awareness training using Incident Response, reducing phishing clicks by 42%		
Created security awareness training using Incident Response, reducing phishing clicks by 56%		
Penetration Tester	, Amazon	2018-11 – 2021-09
Conducted penetration testing using Burp Suite, identifying 1000+ vulnerabilities		
Developed threat intelligence platform using Go, tracking 500+ threats		
AppSec Engineer	, ScaleGrid	2014-04 – 2018-08
Implemented encryption solution using React, protecting 500+ records		
Implemented security monitoring using Snort, detecting 500+ threats		
Built secure CI/CD pipeline using Azure Sentinel, preventing 10000+ security issues		
Implemented encryption solution using Figma, protecting 50000+ records		
Security Architect	, Vercel	2013-04 – 2013-11
Conducted penetration testing using Go, identifying 1000+ vulnerabilities		
Implemented SIEM solution using Redis, processing 500+ logs/day		
Built secure CI/CD pipeline using Snort, preventing 100000+ security issues		
Penetration Tester	, Confluent	2008-09 – 2013-03
Designed zero-trust architecture using GCP Security Command Center, securing 50000+ endpoints		
Created vulnerability management program using GCP Security Command Center, reducing CVEs by 23%		
Implemented security monitoring using SonarQube, detecting 1000+ threats		

TECHNICAL PROFICIENCIES

PowerShell, Python, Bash, Go, Rust, Snort, Burp Suite, CrowdStrike, SonarQube, Nmap, Redis, Elasticsearch, MongoDB, PostgreSQL, Azure Sentinel, GCP Security Command Center, AWS Security Hub, Threat Modeling, SOC2 Compliance

SELECTED PROJECTS

Code Review Bot [Rust, Burp Suite, Go] — Designed and implemented Security Compliance Tool with Rust, integrating with Go for seamless data flow

Real-time Analytics Engine [Rust, Go, Python] — Created Security Dashboard leveraging Python for core functionality and Rust for optimization
