Executive Summary

Lead backend engineering professional with 12 years driving technical strategy and team excellence. Expert in C#, Go, Node.js with track record of building and scaling engineering teams.

Leadership Experience

LLM Engineer 2023-09 – Present

Figma

- Mentored team of 4 junior developers on Microservices best practices
- Built automated CI/CD pipelines with Microservices, reducing deployment time by 50%
- Designed and implemented microservices architecture using Supabase, handling 1000+ concurrent users
- Built event-driven architecture using Supabase, processing 100+ events daily

LLM Engineer 2020-05 – 2023-07

VectorDB Inc

- Built automated CI/CD pipelines with Jenkins, reducing deployment time by 26%
- Optimized database queries using Jenkins, improving query performance by 70%

Platform Engineer 2018-01 – 2020-02

Tesla

- Implemented caching layer with Kotlin, reducing database load by 30%
- Led migration from monolithic to microservices using AWS, improving system scalability by 25%
- Mentored team of 5 junior developers on AWS best practices

API Developer 2013-09 – 2017-09

Datadog

- Built event-driven architecture using Python, processing 10000+ events daily
- Built automated CI/CD pipelines with PostgreSQL, reducing deployment time by 52%
- Optimized database queries using PostgreSQL, improving query performance by 54%

Education

M.Eng. in Artificial Intelligence — University of Waterloo, 2015

Key Skills

C# | Go | Node.js | Kotlin | Java | Rails | Flask | PlanetScale | PostgreSQL | MySQL | ArgoCD | Kafka | Render | Azure | AWS Bedrock | Azure OpenAI | Replicate | Anthropic | Scrum | RAG Architecture | CI/CD
