RESEARCH INTERESTS

Experienced software engineer with expertise in Go, Julia, and JAX. Proven ability to lead technical initiatives and mentor junior team members.

EDUCATION

McGill University 2021
M.Sc. in Artificial Intelligence

PROFESSIONAL EXPERIENCE

NLP Engineer, Anthropic 2025-02 – Present
Built real-time analytics dashboard using ChromaDB, used by 10000+ stakeholders
Implemented A/B testing framework using AWS SageMaker, running 5000+ experiments

AI Product Engineer, Block 2023-06 – 2024-12
Developed computer vision models using Python, achieving 55% accuracy
Implemented A/B testing framework using Python, running 100000+ experiments
Created recommendation system using Bedrock, increasing user engagement by 57%

TECHNICAL PROFICIENCIES

Go, Julia, JAX, Scikit-learn, LangChain, Kubeflow, Airflow, Polars, Neptune, ChromaDB, Pinecone, Redshift, Hugging Face Endpoints, Lambda Labs, Azure ML, GCP Vertex AI, Feature Engineering, Statistical Modeling, Prompt Engineering, RAG, Vector Databases

CERTIFICATIONS

AWS Certified Machine Learning — Amazon Web Services, 2023

SELECTED PROJECTS

SmartCache [Go, Julia, Go] — Implemented Data Warehouse using Go, achieving 99.9% uptime and handling 50k+ requests daily

SmartCache [Go, Julia, Vector Databases] — Developed ML Model Training Pipeline using Vector Databases, reducing processing time by 60% through algorithmic improvements

Task Scheduler [Go, Julia, Airflow] — Implemented Anomaly Detection System using Julia, achieving 99.9% uptime and handling 50k+ requests daily
