About Me

Software developer specializing in Go with hands-on experience in Python. Looking to grow in DevOps / SRE / MLOps.

Education

B.Tech. in Electrical Engineering

2025

McGill University

Teaching Assistant

Projects

AutoScale Monitor (2023)

Designed and implemented CI/CD Pipeline with Python, integrating with Rust for seamless data flow

Tech: HCL, Rust, Python

Schema Validator (2025)

Built Secrets Management with Go and HCL, serving 10,000+ daily active users

Tech: Go, HCL, Python

Vector Search API (2023)

Developed Kubernetes Cluster using Rust, reducing processing time by 60% through algorithmic improvements

Tech: Python, Rust, Go

Skills

- Go
- Python
- Rust
- HCL
- Terraform
- CloudFormation
- ArgoCD
- Ansible
- Kubernetes
- Docker
- Jenkins
- GitHub Actions
- Datadog
- Thanos
- PagerDuty
- Prometheus
- Opsgenie
- AWS
- DigitalOcean
- TensorFlow Serving
- Kale
- Triton Inference Server
- GitOps
- Infrastructure as Code
- SRE Practices

Internships / Experience

DevOps Engineer at ModelShip (2025-08 – Present)

Implemented security scanning using SRE Practices, identifying 10000+ vulnerabilities

Established chaos engineering practices using Zero Trust, improving system resilience

Implemented security scanning using CircleCI, identifying 100000+ vulnerabilities

SRE at Vercel (2023-12 – 2025-03)

Built CI/CD pipelines using Incident Management, reducing deployment time from 8s to 307ms

Established GitOps workflows using DigitalOcean, improving deployment frequency by 38%

Built automated backup solution using Incident Management, ensuring 10000% data protection
