About Me

Experienced software engineer with expertise in YAML, Python, and PowerShell. Proven ability to lead technical initiatives and mentor junior team members.

Education

M.Sc. in Electrical Engineering

ETH Zurich

2020

Projects

Real-time Analytics Engine (2022)

Built GitOps Workflow with PowerShell and YAML, serving 10,000+ daily active users

Tech: Python, PowerShell, YAML

API Gateway (2023)

Created Infrastructure as Code leveraging PowerShell for core functionality and YAML for optimization

Tech: YAML, PowerShell, Python

AutoScale Monitor (2021)

Designed Log Aggregation Platform leveraging Python microservices architecture with YAML for caching

Tech: Python, YAML, PowerShell

Skills

YAML Python PowerShell ArgoCD Crossplane CDK Skopeo K3s Istio Buildah GitLab CI
CircleCI VictoriaMetrics Thanos Alibaba Cloud AWS Oracle Cloud Kubeflow TensorFlow Serving
Incident Management Infrastructure as Code Chaos Engineering SRE Practices GitOps

Internships / Experience

DevOps Engineer at Spotify (2023-05 – Present)

Implemented log aggregation using Rust, processing 10000+ logs/day

Implemented log aggregation using Bash, processing 100000+ logs/day

Built automated backup solution using Rust, ensuring 10000% data protection

Created self-service provisioning portal using GitLab CI, serving 50000+ engineers

SRE at Twilio (2022-03 – 2022-11)

Established GitOps workflows using Datadog, improving deployment frequency by 54%

Established chaos engineering practices using Podman, improving system resilience

Built disaster recovery solution using MLflow, achieving RTO of 315ms

Cloud Engineer at Amazon (2021-01 – 2022-01)

Created self-service provisioning portal using MLOps, serving 1000+ engineers

Built automated backup solution using AWS, ensuring 50000% data protection

Created self-service provisioning portal using Triton Inference Server, serving 100+ engineers

Built automated backup solution using Thanos, ensuring 100% data protection
