Profile

Seasoned software professional with deep expertise in Dart, Swift, and TypeScript. 6 years of experience delivering mission-critical systems.

Experience

React Native Developer at Supabase 2023-08 – Present

Built widget functionality using Swift, increasing daily active users by 21%

Developed mobile application using Swift, achieving 50000+ downloads

Implemented deep linking using Swift, improving conversion rates by 20%

Mobile Developer at Spotify 2020-07 – 2023-08

Optimized app performance using Offline-First, reducing battery consumption by 64%

Implemented app streaming using MVVM, reducing download size by 32%

Implemented push notification system using KMP, increasing user engagement by 37%

Implemented deep linking using Offline-First, improving conversion rates by 29%

Education

B.Sc., Cybersecurity 2019

MIT

Technical Skills

Dart, Swift, TypeScript, KMP, Expo, Fastlane, Xcode, CocoaPods, Hive, Realm, Core Data, Firebase Firestore, SQLite, RevenueCat, Supabase, Firebase, AWS Amplify, App Store Optimization, Clean Architecture, CI/CD for Mobile, MVVM, Offline-First

Projects

AutoScale Monitor — Built Flutter App using KMP and Swift, enabling automated processing and improving efficiency by 40%

Graph Query Builder — Developed App Analytics using Swift, reducing processing time by 60% through algorithmic improvements

Health Check Service — Implemented Push Notification Service using KMP, achieving 99.9% uptime and handling 50k+ requests daily

Other

Award: Innovation Award — MLH 2019
