About Me

Senior backend engineering engineer with 8 years of experience architecting and delivering enterprise solutions. Expert in PHP, C#, Django with demonstrated leadership in cross-functional teams.

Education

B.Eng. in Cybersecurity Purdue University — GPA: 3.46	2017
B.Sc. in Cybersecurity Georgia Tech <i>Teaching Assistant</i>	2016

Projects

ChatBot Framework (2025) Implemented REST API Framework using Django, achieving 99.9% uptime and handling 50k+ requests daily Tech: Django, FastAPI, Flask
API Gateway (2021) Designed Message Queue System leveraging Flask microservices architecture with Rails for caching Tech: Rails, PHP, Flask

Skills

PHP	C#	Django	Flask	FastAPI	Rails	LangChain	PlanetScale	Elasticsearch	MySQL
Jenkins	Docker	GitHub Actions	RabbitMQ	Heroku	GCP	Railway	Azure	DigitalOcean	
Hugging Face	Google Gemini	TDD	Scrum	CI/CD	Agile				

Internships / Experience

Software Engineer at Confluent (2021-10 – Present) Optimized database queries using CI/CD, improving query performance by 26% Developed real-time data processing pipeline using Google Gemini, handling 1000+ logs/second
Server-Side Developer at Figma (2020-07 – 2021-09) Built event-driven architecture using Go, processing 500+ events daily Created authentication and authorization system using Kotlin, securing 5000+ user accounts Mentored team of 6 junior developers on Go best practices
Software Engineer at Anthropic (2018-05 – 2020-05) Designed and implemented message queue system using Anthropic, processing 500+ messages/hour Implemented caching layer with DigitalOcean, reducing database load by 57%
