About Me

Technical leader in backend engineering with extensive experience designing microservices, optimizing performance, and building high-performing teams. Proficiency in Kotlin, Go, C#.

Education

Ph.D. in Cybersecurity	2021
University of Melbourne — GPA: 3.02	
M.Eng. in Computer Science	2020
Imperial College London	

Skills

Kotlin	Go	C#	Express.js	Rails	FastAPI	LlamaIndex	Cassandra	Elasticsearch	RabbitMQ
Docker	Jenkins	Railway	Cloudflare	Azure	Vercel	OpenAI API	Hugging Face	Claude API	
Azure OpenAI	AWS Bedrock	Agile	GraphQL	TDD	CI/CD	Microservices			

Internships / Experience

Backend Developer at Microsoft (2024-11 – Present)
Optimized database queries using FastAPI, improving query performance by 23%
Optimized database queries using Cassandra, improving query performance by 16%
Led migration from monolithic to microservices using Agile, improving system scalability by 18%
Software Engineer at InfraCore (2020-02 – 2024-08)
Built automated CI/CD pipelines with SQLite, reducing deployment time by 20%
Designed and implemented message queue system using Terraform, processing 5000+ messages/hour
