

Scott Cross

scott.cross@yahoo.com | (276)366-5674x916 | Frederickburgh, Germany | <https://scottcross.dev>

SUMMARY

Mid-level backend engineering specialist with 4 years building production systems. Skilled in C#, Rust, Flask with focus on performance optimization and code quality.

WORK EXPERIENCE

Software Engineer 2025-05 — Present

Spotify (full-time)

Optimized database queries using REST API Design, improving query performance by 55%
Created authentication and authorization system using LLM Integration, securing 100000+ user accounts
Built event-driven architecture using REST API Design, processing 500+ events daily

Server-Side Developer 2022-04 — 2025-02

DeployFast (full-time)

Created authentication and authorization system using Microservices, securing 10000+ user accounts
Implemented caching layer with Microservices, reducing database load by 52%

EDUCATION

B.Sc. in Cybersecurity 2022

UC Berkeley

Ph.D. in Mathematics 2022

University of Waterloo — GPA: 3.68

SKILLS

C#, Rust, Flask, Actix, FastAPI, PlanetScale, Elasticsearch, CockroachDB, DynamoDB, MySQL, GitHub Actions, Nginx, RabbitMQ, gRPC, Render, AWS, Fly.io, DigitalOcean, Azure, Hugging Face, Claude API, Anthropic, AWS Bedrock, Google Gemini, CI/CD, TDD, LLM Integration, RAG Architecture, Event-Driven Architecture

PROJECTS

Token Bucket Limiter (*FastAPI, C#, Rust*)

Designed Database Proxy leveraging FastAPI microservices architecture with Rust for caching

Vector Search API (*Rust, C#, Actix*)

Created Database Proxy leveraging Actix for core functionality and C# for optimization

ADDITIONAL

Award: Employee of the Quarter — Google DevFest 2021

Volunteering: Volunteer coding instructor at Hines LLC Youth Program, 2020-Present

Volunteering: Volunteer coding instructor at Bailey, Fletcher and Reid Youth Program, 2024-Present
