## RESEARCH INTERESTS

---

Engineering leader with deep technical background in C, Python, and Bash. 10 years of experience delivering enterprise-scale solutions.

## EDUCATION

---

|                                                                  |      |
|------------------------------------------------------------------|------|
| <b>EPFL</b><br>B.A. in Computer Science, GPA: 2.99               | 2013 |
| <b>University of Toronto</b><br>M.Eng. in Mathematics, GPA: 2.93 | 2012 |

## PROFESSIONAL EXPERIENCE

---

|                                                                                                                                                                                                                                                                                                                                                                                                       |              |                   |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-------------------|
| <b>Security Engineer</b><br>Built incident response automation using Metasploit, reducing recovery time by 38%<br>Implemented SIEM solution using Threat Modeling, processing 100000+ logs/day                                                                                                                                                                                                        | , Block      | 2022-07 – Present |
| <b>AppSec Engineer</b><br>Created vulnerability management program using MongoDB, reducing CVEs by 20%<br>Built incident response automation using MongoDB, reducing recovery time by 68%<br>Conducted penetration testing using GCP Security Command Center, identifying 100+ vulnerabilities<br>Built security automation using GCP Security Command Center, reducing incident response time by 21% | , DeployFast | 2019-04 – 2022-06 |
| <b>AppSec Engineer</b><br>Designed zero-trust architecture using OWASP ZAP, securing 10000+ endpoints<br>Designed zero-trust architecture using Elasticsearch, securing 10000+ endpoints                                                                                                                                                                                                              | , ScaleGrid  | 2015-04 – 2018-11 |

## TECHNICAL PROFICIENCIES

---

C, Python, Bash, Rust, PowerShell, Sigma, OWASP ZAP, Metasploit, Burp Suite, Snort, Wireshark, SonarQube, Hashicorp Vault, Nmap, Splunk, PostgreSQL, Redis, MongoDB, Elasticsearch, GCP Security Command Center, Azure Sentinel, AWS Security Hub, Zero Trust Architecture, Incident Response, SAST/DAST, SOC2 Compliance

## SELECTED PROJECTS

---

**PDF Parser Toolkit** [Bash, Snort, PowerShell] — Designed and implemented Security Audit System with PowerShell, integrating with Bash for seamless data flow

## PUBLICATIONS & OTHER

---

Passionate about accessibility and building technology that makes a difference.
