

Teresa Thomas

Backend Engineering — Victoriachester, Singapore

teresa.thomas@gmail.com · 814.435.9892 · <https://github.com/teresathomas>

Profile

Senior technical leader specializing in backend engineering with expertise in Node.js, C#, Go. Proven success in technical vision, team development, and stakeholder management.

Experience

Platform Engineer

at Uber

2022-02 – Present

Created authentication and authorization system using Docker, securing 50000+ user accounts
Designed and implemented message queue system using Redis, processing 100000+ messages/hour
Reduced infrastructure costs by 45% through optimization using Claude API
Reduced infrastructure costs by 21% through optimization using TDD

AI Engineer

at DataPulse

2019-04 – 2022-02

Architected and built RESTful APIs serving 100000+ requests/day using Redis, reducing response time by 30%
Designed and implemented message queue system using Fly.io, processing 500+ messages/hour
Developed real-time data processing pipeline using Redis, handling 5000+ users/second
Architected and built RESTful APIs serving 100000+ requests/day using Azure, reducing response time by 64%

LLM Engineer

at Cloudflare

2016-02 – 2018-10

Designed and implemented message queue system using Node.js, processing 100000+ messages/hour
Reduced infrastructure costs by 39% through optimization using Node.js
Built automated CI/CD pipelines with Elasticsearch, reducing deployment time by 58%

Education

M.Sc., Cybersecurity

2015

McGill University

Ph.D., Information Technology

2016

Carnegie Mellon University

Technical Skills

Node.js, C#, Go, Flask, Rails, FastAPI, LangChain, Spring Boot, SQLite, Elasticsearch, Ansible, GitHub Actions, RabbitMQ, Nginx, Vercel, Render, Claude API, Google Gemini, Hugging Face, Replicate, OpenAI API, RAG Architecture, GraphQL, Microservices

Other

Hobby: 3D printing
Reference: References available upon request
Personal_statement: Passionate about AI ethics and building technology that makes a difference.
