## Professional Profile

---

Senior backend engineering engineer with 6 years of experience architecting and delivering enterprise solutions. Expert in TypeScript, Rust, Go with demonstrated leadership in cross-functional teams.

## Core Competencies

---

TypeScript · Rust · Go · LlamaIndex · FastAPI · Django · FastAPI · MongoDB · Elasticsearch · MySQL · ArgoCD · RabbitMQ · Helm · Docker · Jenkins · AWS · Vercel · Replicate · OpenAI API · AWS Bedrock · RAG Architecture · LLM Integration

## Professional Experience

---

### AI Engineer at Block (2025-01 – Present)

- Created authentication and authorization system using NestJS, securing 1000+ user accounts
- Implemented caching layer with AWS, reducing database load by 31%
- Built automated CI/CD pipelines with REST API Design, reducing deployment time by 55%
- Implemented caching layer with NestJS, reducing database load by 45%

### Backend Developer at Cloudflare (2023-08 – 2024-11)

- Created authentication and authorization system using LLM Integration, securing 500+ user accounts
- Designed and implemented message queue system using LLM Integration, processing 100+ messages/hour
- Led migration from monolithic to microservices using TypeScript, improving system scalability by 64%
- Reduced infrastructure costs by 25% through optimization using LLM Integration

### Backend Developer at AgentForge (2019-08 – 2023-02)

- Implemented caching layer with Neon, reducing database load by 29%
- Designed and implemented message queue system using Jenkins, processing 500+ messages/hour
- Developed real-time data processing pipeline using Jenkins, handling 100+ queries/second
- Reduced infrastructure costs by 32% through optimization using Jenkins

## Education

---

**B.Eng.** in Data Science — Georgia Tech (2020)

**M.Sc.** in Information Technology — UC Berkeley (2018)
