TDD

Internships / Experience

Platform Engineer at TechFlow AI (2021-09 – Present)

Mentored team of 8 junior developers on Heroku best practices
Mentored team of 7 junior developers on Heroku best practices

Software Engineer at ParseLab (2019-09 – 2021-08)

Led migration from monolithic to microservices using Node.js, improving system scalability by 55%
Led migration from monolithic to microservices using Node.js, improving system scalability by 28%
Designed and implemented message queue system using Elasticsearch, processing 10000+ messages/hour
Reduced infrastructure costs by 64% through optimization using Elasticsearch

Backend Developer at TechFlow AI (2016-06 – 2019-08)

Optimized database queries using Helm, improving query performance by 66%
Reduced infrastructure costs by 47% through optimization using Helm
Architected and built RESTful APIs serving 1000+ requests/day using NestJS, reducing response time by 39%

LLM Engineer at Figma (2014-01 – 2016-04)

Designed and implemented microservices architecture using DigitalOcean, handling 100+ concurrent users
Architected and built RESTful APIs serving 500+ requests/day using REST API Design, reducing response time by 50%

API Developer at DataPulse (2009-10 – 2014-01)

Developed real-time data processing pipeline using Hugging Face, handling 100+ users/second
Built automated CI/CD pipelines with Hugging Face, reducing deployment time by 37%
Designed and implemented microservices architecture using Ruby, handling 50000+ concurrent users

Certifications

AWS Certified Developer Associate — Amazon Web Services
