Professional Profile

Seasoned software professional with deep expertise in C, Rust, and Go. 5 years of experience delivering mission-critical systems.

Core Competencies

C · Rust · Go · Bash · OWASP ZAP · Snort · Trivy · Nessus · SonarQube · Wireshark · Hashicorp Vault · PostgreSQL · Elasticsearch · Redis · MongoDB · Azure Sentinel · GCP Security Command Center · AWS Security Hub · SAST/DAST · Zero Trust Architecture · OWASP Top 10 · Incident Response

Professional Experience

AppSec Engineer at VectorDB Inc (2023-01 – Present)

- Created vulnerability management program using C, reducing CVEs by 39%
- Designed zero-trust architecture using Nmap, securing 100+ endpoints
- Implemented encryption solution using Angular, protecting 100+ records
- Implemented identity management using Nmap, securing 100000+ user identities

Security Architect at Spotify (2020-10 – 2022-10)

- Built incident response automation using C, reducing recovery time by 28%
- Implemented identity management using SonarQube, securing 50000+ user identities

Education

Ph.D. in Artificial Intelligence — MIT (2018)

M.Sc. in Computer Science — University of Michigan (2017)
