Internships / Experience

Software Engineer at AgentForge (2023-05 – Present)
Reduced infrastructure costs by 59% through optimization using OpenAI API
Designed and implemented microservices architecture using Go, handling 100000+ concurrent users
Designed and implemented microservices architecture using Git, handling 10000+ concurrent users
Implemented caching layer with OpenAI API, reducing database load by 22%
Backend Developer at HashiCorp (2022-03 – 2022-12)
Created authentication and authorization system using Git, securing 10000+ user accounts
Reduced infrastructure costs by 70% through optimization using Git
API Developer at Datadog (2021-04 – 2021-11)
Designed and implemented message queue system using Claude API, processing 100000+ messages/hour
Built event-driven architecture using Helm, processing 100000+ events daily
Architected and built RESTful APIs serving 100000+ requests/day using Claude API, reducing response time by 59%
Built event-driven architecture using AWS, processing 5000+ events daily
