

Jorge Matthews

Backend Engineering — Nathanmouth, Japan

jorge.matthews@yahoo.com · 398-556-0125x6253 · <https://github.com/jorgemattthews>

Profile

Technical leader in backend engineering with extensive experience designing microservices, optimizing performance, and building high-performing teams. Proficiency in Ruby, Kotlin, Go.

Experience

Software Engineer at NeuroLink Labs 2025-04 – Present

- Created authentication and authorization system using Cloudflare, securing 500+ user accounts
- Led migration from monolithic to microservices using Cloudflare, improving system scalability by 61%
- Reduced infrastructure costs by 67% through optimization using Terraform
- Architected and built RESTful APIs serving 500+ requests/day using Terraform, reducing response time by 65%

API Developer at PipelineIO 2024-03 – 2025-04

- Reduced infrastructure costs by 27% through optimization using Redis
- Reduced infrastructure costs by 15% through optimization using Redis

Server-Side Developer at Nvidia 2020-03 – 2023-12

- Designed and implemented microservices architecture using Neon, handling 1000+ concurrent users
- Architected and built RESTful APIs serving 100000+ requests/day using Neon, reducing response time by 63%

Education

B.Eng., Data Science 2019
IIT Bombay

M.Tech., Data Science 2019
KAIST

Technical Skills

Ruby, Kotlin, Go, FastAPI, NestJS, Rails, Actix, Gin, DynamoDB, Elasticsearch, MySQL, Supabase, CockroachDB, Terraform, Nginx, gRPC, Kubernetes, Jenkins, Fly.io, AWS, GCP, Heroku, DigitalOcean, Google Gemini, Anthropic, Claude API, Azure OpenAI, LLM Integration, Agile, Microservices, Event-Driven Architecture, GraphQL

Projects

Graph Query Builder — Built Payment Processing System with FastAPI and Ruby, serving 10,000+ daily active users

Other

Publication: "Act read response degree nothing focus" — NeurIPS 2025
