About Me

Mid-level backend engineering specialist with 3 years building production systems. Skilled in Python, TypeScript, Node.js with focus on performance optimization and code quality.

Education

B.Sc. in Computer Science

2022

TU Delft
Dean's List

Projects

API Gateway (2019)

Designed and implemented gRPC Services with Gin, integrating with C# for seamless data flow
Tech: Python, C#, Gin

Real-time Analytics Engine (2022)

Designed and implemented Message Queue System with Flask, integrating with FastAPI for seamless data flow
Tech: Flask, TypeScript, FastAPI

Skills

- Python
- TypeScript
- Node.js
- C#
- Flask
- FastAPI
- Gin
- LangChain
- SQLite
- Neon
- Redis
- Cassandra
- PostgreSQL
- ArgoCD
- RabbitMQ
- Helm
- AWS
- Fly.io
- Hugging Face
- Azure OpenAI
- AWS Bedrock
- Replicate
- TDD
- RAG Architecture
- Event-Driven Architecture

Internships / Experience

Platform Engineer at Meta (2023-06 – Present)

Mentored team of 5 junior developers on Cassandra best practices
Architected and built RESTful APIs serving 5000+ requests/day using Kafka, reducing response time by 29%
Created authentication and authorization system using Jenkins, securing 1000+ user accounts
