SUMMARY

Mid-level backend engineering specialist with 4 years building production systems. Skilled in Ruby, Java, LlamaIndex with focus on performance optimization and code quality.

WORK EXPERIENCE

Software Engineer 2022-01 — Present

Notion (full-time)

Led migration from monolithic to microservices using Express.js, improving system scalability by 55%
Mentored team of 3 junior developers on Rails best practices
Optimized database queries using Cloudflare, improving query performance by 49%
Built event-driven architecture using Hugging Face, processing 5000+ events daily

EDUCATION

Ph.D. in Information Technology 2021

University of Washington

B.Sc. in Cybersecurity 2018

TU Delft

SKILLS

Ruby, Java, LlamaIndex, Express.js, Flask, NestJS, Elasticsearch, Neon, gRPC, Nginx, Kafka, Railway, Azure, GCP, DigitalOcean, Vercel, AWS Bedrock, Claude API, Google Gemini, Azure OpenAI, CI/CD, Event-Driven Architecture, LLM Integration, Scrum, Microservices

PROJECTS

AutoScale Monitor (*NestJS, Flask, Java*)

Created Payment Processing System leveraging NestJS for core functionality and Java for optimization

ChatBot Framework (*Express.js, Flask, Ruby*)

Created User Management API leveraging Express.js for core functionality and Ruby for optimization

SmartCache (*Ruby, Flask, Java*)

Designed and implemented Payment Processing System with Flask, integrating with Java for seamless data flow

CERTIFICATIONS

AWS Certified Developer Associate — Amazon Web Services (2023)
