SUMMARY

Mid-level data science / ml / ai specialist with 4 years building production systems. Skilled in MATLAB, Go, Python with focus on performance optimization and code quality.

WORK EXPERIENCE

NLP Engineer <i>AgentForge (full-time)</i> Built real-time analytics dashboard using LightGBM, used by 1000+ stakeholders Built real-time analytics dashboard using LightGBM, used by 100+ stakeholders Developed ML models using Pinecone, improving prediction accuracy by 39% Built real-time analytics dashboard using Dagster, used by 100000+ stakeholders	2025-04 — Present
AI Product Engineer <i>Vercel (full-time)</i> Developed ML models using LightGBM, improving prediction accuracy by 69% Implemented NLP solution using Computer Vision, processing 5000+ text documents daily	2023-05 — 2025-02
AI Engineer <i>Figma (full-time)</i> Developed computer vision models using Airflow, achieving 62% accuracy Built real-time analytics dashboard using Dagster, used by 5000+ stakeholders Developed ML models using R, improving prediction accuracy by 63%	2021-04 — 2023-01

EDUCATION

M.Tech. in Mathematics <i>KAIST — GPA: 3.35</i>	2021
B.A. in Data Science <i>University of Michigan — GPA: 3.41</i>	2019

SKILLS

MATLAB, Go, Python, Julia, SQL, TensorFlow, Claude API, Dask, Neptune, Airflow, Kubeflow, NumPy, MongoDB, Snowflake, Lambda Labs, Azure ML, Databricks, GCP Vertex AI, A/B Testing, NLP, Prompt Engineering, MLOps

PROJECTS

- API Gateway** (*MATLAB, SQL, Julia*)
Developed A/B Testing Framework using Julia, reducing processing time by 60% through algorithmic improvements
- Real-time Analytics Engine** (*MATLAB, SQL, Go*)
Created MLOps Platform leveraging Go for core functionality and SQL for optimization
- SmartCache** (*Julia, MATLAB, Python*)

Implemented Recommendation Engine using Julia, achieving 99.9% uptime and handling 50k+ requests daily
