

Lisa Mcknight

DevOps / SRE / MLOps — East Paulashire, USA

lisa.mcknight@gmail.com · 4154767647 · <https://github.com/lisamcknight>

Profile

Executive-level technology leader with extensive background in devops / sre / mlops. Expertise in HCL, Python, PowerShell with track record of transforming organizations through technology.

Experience

DevOps Engineer	at Palantir	2022-06 – Present
Established chaos engineering practices using HCL, improving system resilience		
Built disaster recovery solution using Istio, achieving RTO of 92ms		
SRE	at SkillBridge	2018-09 – 2022-05
Implemented log aggregation using Datadog, processing 50000+ logs/day		
Established chaos engineering practices using SRE Practices, improving system resilience		
Built CI/CD pipelines using SRE Practices, reducing deployment time from 24s to 213ms		
Designed and implemented infrastructure as code using MLOps, managing 50000+ servers		
Platform Engineer	at Spotify	2015-11 – 2018-06
Implemented container orchestration using GitLab CI, managing 100+ containers		
Optimized cloud infrastructure using GitLab CI, reducing costs by 38%		
Implemented log aggregation using GitLab CI, processing 100+ logs/day		
Implemented container orchestration using VictoriaMetrics, managing 500+ containers		
DevOps Engineer	at Anthropic	2011-05 – 2015-05
Designed and implemented infrastructure as code using Argo Workflows, managing 100000+ servers		
Established chaos engineering practices using Thanos, improving system resilience		
Implemented container orchestration using Thanos, managing 100000+ containers		
Platform Engineer	at Nvidia	2007-12 – 2010-11
Created self-service provisioning portal using Argo Workflows, serving 100+ engineers		
Established chaos engineering practices using Zero Trust, improving system resilience		

Education

Ph.D., Software Engineering	2008
University of Waterloo	
B.Eng., Mathematics	2008
Columbia University	

Technical Skills

HCL, Python, PowerShell, Bash, Terraform, Helm, Buildah, Istio, Podman, Envoy, Argo Workflows, Tekton, CircleCI, Jenkins, VictoriaMetrics, Opsgenie, Datadog, PagerDuty, Linode, Oracle Cloud, Triton Inference

Server, TorchServe, TensorFlow Serving, MLflow, Seldon, Chaos Engineering, Infrastructure as Code, Incident Management

Projects

Task Scheduler — Implemented Kubernetes Cluster using Python, achieving 99.9% uptime and handling 50k+ requests daily

Health Check Service — Created CI/CD Pipeline leveraging HCL for core functionality and PowerShell for optimization

Log Aggregator — Developed Observability Dashboard using HCL, reducing processing time by 60% through algorithmic improvements

Other

Publication: "Have power here just meet open war best father game" — IEEE 2023

Volunteering: Volunteer coding instructor at Holmes, Fox and Romero Youth Program, 2024-Present

Spoken_language: Turkish (Native)
