

Erin Ingram

DevOps / SRE / MLOps — East Fred, Canada

erin.ingram@ingram.dev · 001-594-397-3203 · <https://linkedin.com/in/erin-ingram>

Profile

Lead devops / sre / mlops professional with 9 years driving technical strategy and team excellence. Expert in Bash, HCL, Rust with track record of building and scaling engineering teams.

Experience

SRE	at Netflix	2025-08 – Present
Designed and implemented infrastructure as code using SRE Practices, managing 100000+ servers		
Implemented security scanning using SRE Practices, identifying 100+ vulnerabilities		
Cloud Engineer	at HashiCorp	2023-07 – 2025-05
Established chaos engineering practices using SRE Practices, improving system resilience		
Created self-service provisioning portal using Prometheus, serving 5000+ engineers		
DevOps Engineer	at TechFlow AI	2019-09 – 2023-03
Built disaster recovery solution using Infrastructure as Code, achieving RTO of 98ms		
Designed and implemented infrastructure as code using Infrastructure as Code, managing 50000+ servers		
Established chaos engineering practices using Infrastructure as Code, improving system resilience		
Designed and implemented infrastructure as code using Infrastructure as Code, managing 100000+ servers		
Release Engineer	at Palantir	2016-11 – 2019-07
Designed and implemented infrastructure as code using Terraform, managing 50000+ servers		
Established chaos engineering practices using Azure DevOps, improving system resilience		
Created monitoring and alerting system using Terraform, reducing MTTR by 39%		

Education

B.Eng., Computer Science	2018
University of Melbourne	

Technical Skills

Bash, HCL, Rust, Python, Pulumi, Terraform, Podman, Docker, Buildah, Azure DevOps, Tekton, Thanos, Datadog, Linode, DigitalOcean, Alibaba Cloud, AWS, GCP, Seldon, TorchServe, Platform Engineering, MLOps, Infrastructure as Code, Zero Trust

Projects

Vector Search API — Designed and implemented Chaos Engineering Framework with Bash, integrating with Rust for seamless data flow

Schema Validator — Created Disaster Recovery System leveraging Python for core functionality and Bash for optimization

Config Manager — Designed Disaster Recovery System leveraging HCL microservices architecture with Rust for caching

Certifications

HashiCorp Terraform Associate (HashiCorp, 2019)

Other

Volunteering: Volunteer coding instructor at Ortega-Murphy Youth Program, 2020-Present

Award: Best Paper Award — ACM 2025

Spoken_language: Swedish (Basic)
