SUMMARY

Lead data science / ml / ai professional with 10 years driving technical strategy and team excellence. Expert in Go, Python, Scala with track record of building and scaling engineering teams.

WORK EXPERIENCE

Data Scientist

2022-10 — Present

AgentForge (internship)

Implemented A/B testing framework using XGBoost, running 100000+ experiments

Implemented A/B testing framework using Pandas, running 100000+ experiments

Established MLOps practices using Prompt Engineering, reducing model deployment time by 37%

Research Scientist

2018-07 — 2022-04

ScaleGrid (full-time)

Developed data visualization tools using Julia, used by 5000+ analysts

Developed computer vision models using Pandas, achieving 70% accuracy

Created recommendation system using ChromaDB, increasing user engagement by 20%

Designed data warehousing solution using ChromaDB, enabling analytics on 500+ records

AI Product Engineer

2015-12 — 2018-02

Airbnb (full-time)

Established MLOps practices using Computer Vision, reducing model deployment time by 21%

Built ML model serving infrastructure using MATLAB, handling 1000+ predictions/day

Developed data visualization tools using Pandas, used by 50000+ analysts

Data Analyst

2015-02 — 2015-09

Netflix (freelance)

Built ML model serving infrastructure using Scala, handling 500+ predictions/day

Developed ML models using Scala, improving prediction accuracy by 63%

EDUCATION

B.Tech. in Software Engineering

2014

Tsinghua University

SKILLS

Go, Python, Scala, SQL, Claude API, LangChain, OpenAI API, JAX, MLflow, Dask, Weights & Biases, Neptune, BigQuery, ChromaDB, Qdrant, Pinecone, AWS SageMaker, Azure ML, LLM Evaluation, Vector Databases, Feature Engineering

PROJECTS

Health Check Service *(Scala, Python, SQL)*

Implemented Anomaly Detection System using Scala, achieving 99.9% uptime and handling 50k+ requests daily

ADDITIONAL

Award: Outstanding Contributor — MLH 2019
