

Michael Bender

Cybersecurity — Port Jacob, Canada

michael.bender@bender.dev · 724.806.4242 · <https://linkedin.com/in/michael-bender> · <https://github.com/michaelbender>

Profile

Executive-level technology leader with extensive background in cybersecurity. Expertise in Go, Rust, Python with track record of transforming organizations through technology.

Experience

Security Architect at Microsoft 2021-12 – Present

Implemented encryption solution using Figma, protecting 1000+ records
Developed threat intelligence platform using Splunk, tracking 500+ threats
Created vulnerability management program using Burp Suite, reducing CVEs by 29%

Penetration Tester at DataPulse 2017-08 – 2021-08

Implemented SIEM solution using CrowdStrike, processing 1000+ logs/day
Built incident response automation using Nmap, reducing recovery time by 48%
Built secure CI/CD pipeline using Threat Modeling, preventing 100000+ security issues
Built secure CI/CD pipeline using Threat Modeling, preventing 10000+ security issues

Penetration Tester at PromptStack 2014-11 – 2017-05

Created security awareness training using GCP Security Command Center, reducing phishing clicks by 61%
Implemented encryption solution using Angular, protecting 50000+ records

Security Architect at Shopify 2010-05 – 2014-05

Created vulnerability management program using Incident Response, reducing CVEs by 29%
Developed threat intelligence platform using GCP Security Command Center, tracking 100+ threats
Created security awareness training using Incident Response, reducing phishing clicks by 45%
Implemented identity management using GCP Security Command Center, securing 10000+ user identities

Security Engineer at Amazon 2007-09 – 2010-04

Built incident response automation using Nmap, reducing recovery time by 64%
Designed zero-trust architecture using SOC2 Compliance, securing 5000+ endpoints
Built incident response automation using Zero Trust Architecture, reducing recovery time by 21%

Education

M.Sc., Software Engineering 2008
Carnegie Mellon University

B.Sc., Information Technology 2005
Imperial College London

Technical Skills

Go, Rust, Python, Bash, OWASP ZAP, Suricata, Snort, Burp Suite, Metasploit, Trivy, CrowdStrike, Nmap, Hashicorp Vault, PostgreSQL, MongoDB, Elasticsearch, AWS Security Hub, Azure Sentinel, GCP Security Command Center, SAST/DAST, OWASP Top 10, Incident Response

Other

Volunteering: Volunteer coding instructor at Thompson LLC Youth Program, 2021-Present
