RESEARCH INTERESTS

Experienced software engineer with expertise in Julia, R, and SQL. Proven ability to lead technical initiatives and mentor junior team members.

EDUCATION

Carnegie Mellon University M.Sc. in Software Engineering	2022
TU Delft M.Eng. in Software Engineering	2019

PROFESSIONAL EXPERIENCE

Research Scientist Built real-time analytics dashboard using GCP Vertex AI, used by 500+ stakeholders Built ML model serving infrastructure using Polars, handling 100000+ predictions/day	, Figma 2023-03 – Present
Research Scientist Developed computer vision models using XGBoost, achieving 67% accuracy Created recommendation system using PyTorch, increasing user engagement by 56%	, PipelineIO 2021-07 – 2023-03

TECHNICAL PROFICIENCIES

Julia, R, SQL, Python, Go, OpenCV, Hugging Face, LangChain, Scikit-learn, Dask, Polars, Redshift, Neo4j, Pinecone, Databricks, Weaviate, Lambda Labs, AWS SageMaker, Azure ML, Bedrock, Databricks, A/B Testing, Statistical Modeling, Vector Databases

SELECTED PROJECTS

- Event Sourcing Engine** [R, Python, Julia] — Built BI Dashboard with Python and R, serving 10,000+ daily active users
- Token Bucket Limiter** [R, Go, SQL] — Implemented Predictive Analytics Platform using Go, achieving 99.9% uptime and handling 50k+ requests daily
- Log Aggregator** [SQL, Julia, Go] — Designed and implemented MLOps Platform with Julia, integrating with Go for seamless data flow
