Profile

Lead mobile development professional with 10 years driving technical strategy and team excellence. Expert in Kotlin, Java, Dart with track record of building and scaling engineering teams.

Experience

iOS Developer	at CodeCraft Studios	2025-01 – Present
Developed mobile application using Firebase, achieving 1000+ downloads		
Built AR/VR features using Swift, increasing user retention by 33%		
Built AR/VR features using Firebase, increasing user retention by 32%		
Android Developer	at HashiCorp	2020-06 – 2024-12
Developed cross-platform solution using Core Data, reducing development time by 40%		
Developed cross-platform solution using SQLite, reducing development time by 48%		
Built AR/VR features using Core Data, increasing user retention by 21%		
Created in-app purchase integration using SQLite, generating 1000+ in revenue		
Mobile Developer	at PromptStack	2018-03 – 2020-02
Optimized app performance using Hive, reducing battery consumption by 34%		
Implemented app streaming using Firebase, reducing download size by 53%		
Mobile Developer	at DataPulse	2015-10 – 2017-09
Created app analytics tracking using Firebase Firestore, providing insights on 50000+ users		
Developed cross-platform solution using Firebase, reducing development time by 54%		
Created in-app purchase integration using UIKit, generating 50000+ in revenue		
Built widget functionality using Firebase Firestore, increasing daily active users by 33%		

Education

M.Tech., Data Science	2014
Columbia University	
B.Eng., Computer Science	2013
Stanford University	

Technical Skills

Kotlin, Java, Dart, Swift, Flutter, Expo, UIKit, Xcode, Android Studio, TestFlight, CocoaPods, Firebase, Firebase Firestore, Realm, Hive, Supabase, RevenueCat, AWS Amplify, Firebase, Clean Architecture, Offline-First

Projects

Feature Store — Built Mobile CI/CD with Java and Kotlin, serving 10,000+ daily active users

Other

Award: Outstanding Contributor — Google DevFest 2019
