

Christopher Mccoy

Backend Engineering — Kaylaburgh, Canada

christopher.mccoy@outlook.com · 714-960-7455x53470 · <https://github.com/christophermccoy>

Profile

Experienced software engineer with expertise in Kotlin, TypeScript, and Rust. Proven ability to lead technical initiatives and mentor junior team members.

Experience

LLM Engineer

at Confluent

2025-03 – Present

Designed and implemented message queue system using Docker, processing 5000+ messages/hour
Built event-driven architecture using Docker, processing 100+ events daily
Developed real-time data processing pipeline using Docker, handling 10000+ messages/second
Built event-driven architecture using Docker, processing 5000+ events daily

API Developer

at Supabase

2024-02 – 2025-01

Mentored team of 6 junior developers on Scrum best practices
Led migration from monolithic to microservices using Elasticsearch, improving system scalability by 28%
Implemented caching layer with Elasticsearch, reducing database load by 61%

Server-Side Developer

at Quantum Edge

2022-09 – 2024-01

Created authentication and authorization system using Kafka, securing 10000+ user accounts
Optimized database queries using Express.js, improving query performance by 38%
Developed real-time data processing pipeline using AWS, handling 100+ users/second

Education

B.Eng., Information Technology

2021

University of Edinburgh

M.Tech., Mathematics

2021

UT Austin

Technical Skills

Kotlin, TypeScript, Rust, Ruby, Go, LangChain, Rails, FastAPI, Flask, Django, Elasticsearch, CockroachDB, Ansible, Git, Kubernetes, Cloudflare, Vercel, GCP, Railway, Azure, AWS Bedrock, Azure OpenAI, Microservices, Agile, TDD, LLM Integration, RAG Architecture

Projects

Prompt Playground — Implemented Message Queue System using Rust, achieving 99.9% uptime and handling 50k+ requests daily

Other

Spoken_language: Russian (Basic)

Hobby: Podcasting

Personal_statement: Passionate about AI ethics and building technology that makes a difference.
