

Brian Moore

Backend Engineering — South Mackenzieborough, India

brian.moore@outlook.com · 612.385.2464x8449 · <https://github.com/brianmoore>

Profile

Technical leader in backend engineering with extensive experience designing microservices, optimizing performance, and building high-performing teams. Proficiency in Go, TypeScript, C#.

Experience

Platform Engineer	at DataPulse	2025-02 – Present
Led migration from monolithic to microservices using CI/CD, improving system scalability by 24%		
Built automated CI/CD pipelines with CI/CD, reducing deployment time by 22%		
Designed and implemented message queue system using Nginx, processing 100000+ messages/hour		
API Developer	at Supabase	2023-01 – 2024-10
Implemented caching layer with Actix, reducing database load by 28%		
Built automated CI/CD pipelines with RabbitMQ, reducing deployment time by 39%		
LLM Engineer	at Twilio	2022-02 – 2022-08
Mentored team of 4 junior developers on DynamoDB best practices		
Architected and built RESTful APIs serving 100+ requests/day using Django, reducing response time by 19%		
Designed and implemented message queue system using Kubernetes, processing 10000+ messages/hour		
AI Engineer	at PromptStack	2020-04 – 2022-01
Built event-driven architecture using NestJS, processing 10000+ events daily		
Developed real-time data processing pipeline using ArgoCD, handling 10000+ logs/second		

Education

B.Sc., Data Science	2020
MIT	
M.Tech., Artificial Intelligence	2018
KAIST	

Technical Skills

Go, TypeScript, C#, Kotlin, Python, Actix, NestJS, LangChain, ASP.NET, FastAPI, Cassandra, SQLite, CockroachDB, Elasticsearch, Neon, gRPC, GitHub Actions, Git, Jenkins, Terraform, GCP, Vercel, AWS Bedrock, Claude API, Azure OpenAI, CI/CD, RAG Architecture

Certifications

Certified Kubernetes Administrator (CNCF, 2019)
AWS Certified Solutions Architect (Amazon Web Services, 2022)

Other

Award: Employee of the Quarter — Company Internal 2025
