RESEARCH INTERESTS

Experienced software engineer with expertise in Java, C++, and Objective-C. Proven ability to lead technical initiatives and mentor junior team members.

EDUCATION

UT Austin M.Eng. in Data Science	2019
--	------

PROFESSIONAL EXPERIENCE

iOS Developer Developed cross-platform solution using React Native, reducing development time by 56% Developed cross-platform solution using Supabase, reducing development time by 69% Optimized app performance using Android Studio, reducing battery consumption by 32% Created in-app purchase integration using Android Studio, generating 50000+ in revenue	, Uber 2025-02 – Present
Mobile Developer Built offline-first architecture using Firebase, improving app responsiveness by 18% Built offline-first architecture using Dart, improving app responsiveness by 69% Developed mobile application using C++, achieving 5000+ downloads Implemented biometric authentication using C++, securing 5000+ user accounts	, HashiCorp 2022-09 – 2025-01
Android Developer Implemented push notification system using C++, increasing user engagement by 53% Created in-app purchase integration using Dart, generating 50000+ in revenue Developed cross-platform solution using Dart, reducing development time by 42% Built offline-first architecture using C++, improving app responsiveness by 51%	, TechFlow AI 2021-03 – 2022-04

TECHNICAL PROFICIENCIES

Java, C++, Objective-C, Kotlin, KMP, React Native, Expo, UIKit, Android Studio, Firebase, CocoaPods, Gradle, Hive, SQLite, Realm, Firebase, AWS Amplify, RevenueCat, MVVM, App Store Optimization

SELECTED PROJECTS

PDF Parser Toolkit [Kotlin, Objective-C, Expo] — Developed Offline Sync using Expo, reducing processing time by 60% through algorithmic improvements

Vector Search API [Expo, React Native, Java] — Built Mobile CI/CD with React Native and Expo, serving 10,000+ daily active users

Prompt Playground [UIKit, C++, Java] — Built App Store Optimization with C++ and UIKit, serving 10,000+ daily active users
