

# Terry Silva

Data Science / ML / AI | Fresher | New Andrea, Brazil

terry.silva@yahoo.com | 375.824.4182x226 | <https://linkedin.com/in/terry-silva>

## About Me

---

Results-driven data science / ml / ai professional with 5 years of experience designing and implementing scalable solutions using Go, Julia, MATLAB. Track record of delivering high-impact projects.

## Education

---

### M.Sc. in Software Engineering

2022

University of Waterloo

## Skills

---

Go Julia MATLAB Python Hugging Face XGBoost Keras MLflow Dagster Spark Airflow  
Snowflake Neo4j Redshift Azure ML Lambda Labs GCP Vertex AI Bedrock Feature Engineering  
Deep Learning

## Internships / Experience

---

### Data Scientist at DataPulse (2024-01 – Present)

Implemented A/B testing framework using JAX, running 1000+ experiments

Established MLOps practices using LLM Evaluation, reducing model deployment time by 49%

Developed data visualization tools using LLM Evaluation, used by 100000+ analysts

Developed ML models using Fine-tuning, improving prediction accuracy by 28%

### Data Scientist at Quantum Edge (2022-11 – 2023-07)

Developed computer vision models using Airflow, achieving 18% accuracy

Implemented A/B testing framework using Weights & Biases, running 1000+ experiments

Developed ML models using Databricks, improving prediction accuracy by 47%

Implemented NLP solution using GCP Vertex AI, processing 500+ text documents daily

### Research Scientist at Netflix (2021-06 – 2022-05)

Developed data visualization tools using MLOps, used by 10000+ analysts

Built ML model serving infrastructure using MLOps, handling 5000+ predictions/day

Built ML model serving infrastructure using MLOps, handling 100+ predictions/day

Implemented NLP solution using Dask, processing 500+ text documents daily

### Data Scientist at Stripe (2019-11 – 2020-12)

Built real-time analytics dashboard using Lambda Labs, used by 100+ stakeholders

Built ML model serving infrastructure using LightGBM, handling 100000+ predictions/day

Created feature engineering pipeline using Weaviate, reducing preprocessing time by 48%

Established MLOps practices using LlamaIndex, reducing model deployment time by 27%
