RESEARCH INTERESTS

Technical leader in devops / sre / mlops with extensive experience designing microservices, optimizing performance, and building high-performing teams. Proficiency in Python, Go, HCL.

EDUCATION

Stanford University B.A. in Computer Science	2017
Georgia Tech Ph.D. in Information Technology	2017

PROFESSIONAL EXPERIENCE

Release Engineer Established GitOps workflows using Linode, improving deployment frequency by 58% Implemented security scanning using Seldon, identifying 5000+ vulnerabilities Implemented log aggregation using Seldon, processing 50000+ logs/day	, InfraCore	2022-11 – Present
DevOps Engineer Created monitoring and alerting system using GitLab CI, reducing MTTR by 60% Established chaos engineering practices using Jenkins, improving system resilience Created self-service provisioning portal using CircleCI, serving 500+ engineers Implemented log aggregation using CircleCI, processing 50000+ logs/day	, Notion	2020-12 – 2022-09
Infrastructure Engineer Optimized cloud infrastructure using Tekton, reducing costs by 55% Built CI/CD pipelines using Argo Workflows, reducing deployment time from 23s to 300ms Created monitoring and alerting system using Argo Workflows, reducing MTTR by 50%	, NeuroLink Labs	2019-02 – 2020-10

TECHNICAL PROFICIENCIES

Python, Go, HCL, Bash, CloudFormation, Ansible, Helm, Podman, K3s, Azure DevOps, Jenkins, GitLab CI, CircleCI, GitHub Actions, VictoriaMetrics, Prometheus, Thanos, Grafana, Datadog, GCP, Hetzner, Oracle Cloud, DigitalOcean, Triton Inference Server, TorchServe, MLflow, Kubeflow, Kale, MLOps, GitOps

SELECTED PROJECTS

- Config Manager** [Python, Bash, HCL] — Built Disaster Recovery System with HCL and Bash, serving 10,000+ daily active users
- Resume Parser** [Go, Bash, Python] — Implemented Container Registry using Go, achieving 99.9% uptime and handling 50k+ requests daily
- Resume Parser** [HCL, Go, Bash] — Designed and implemented Log Aggregation Platform with HCL, integrating with Go for seamless data flow
