About Me

Executive-level technology leader with extensive background in data science / ml / ai. Expertise in Julia, Python, Go with track record of transforming organizations through technology.

Education

M.Eng. in Computer Science2012

NUS

Projects

AutoScale Monitor (2023)
Implemented Anomaly Detection System using Python, achieving 99.9% uptime and handling 50k+ requests daily
Tech: Python, Julia, Go

Feature Store (2023)
Built MLOps Platform with Go and Python, serving 10,000+ daily active users
Tech: Go, Python, Julia

Internships / Experience

LLM Engineer at VectorDB Inc (2021-10 – Present)
Developed data visualization tools using MongoDB, used by 100+ analysts
Developed data visualization tools using SQL, used by 50000+ analysts

AI Product Engineer at Apple (2017-09 – 2021-04)
Designed data warehousing solution using PyTorch, enabling analytics on 1000+ records
Built end-to-end ML pipeline using PyTorch, processing 100000+ samples daily
Developed data visualization tools using XGBoost, used by 100000+ analysts
Developed data visualization tools using LlamaIndex, used by 10000+ analysts

Research Scientist at CodeCraft Studios (2013-01 – 2017-05)
Developed computer vision models using Dask, achieving 51% accuracy
Created recommendation system using TensorFlow, increasing user engagement by 17%

Certifications

Databricks Certified Data Engineer — Databricks
