

William Ray

Backend Engineering — Patrickton, Australia

william.ray@gmail.com · 5145473404 · <https://github.com/williamray>

Profile

Mid-level backend engineering specialist with 4 years building production systems. Skilled in TypeScript, Go, Rails with focus on performance optimization and code quality.

Experience

LLM Engineer at Notion 2024-10 – Present

Built automated CI/CD pipelines with SQLite, reducing deployment time by 50%
Designed and implemented message queue system using Express.js, processing 10000+ messages/hour

Software Engineer at Airbnb 2023-06 – 2024-09

Architected and built RESTful APIs serving 5000+ requests/day using Neon, reducing response time by 50%
Led migration from monolithic to microservices using Microservices, improving system scalability by 15%
Designed and implemented microservices architecture using PHP, handling 5000+ concurrent users

Backend Developer at Anthropic 2022-04 – 2023-06

Designed and implemented message queue system using Event-Driven Architecture, processing 50000+ messages/hour
Created authentication and authorization system using AWS Bedrock, securing 1000+ user accounts

Education

M.Sc., Cybersecurity 2021

Imperial College London

Technical Skills

TypeScript, Go, Rails, FastAPI, MySQL, Redis, PlanetScale, Git, Docker, Kubernetes, Terraform, Vercel, Fly.io, Cloudflare, AWS, OpenAI API, Google Gemini, Azure OpenAI, Claude API, AWS Bedrock, Scrum, CI/CD, RAG Architecture, Event-Driven Architecture, REST API Design

Projects

Health Check Service — Built Microservices Platform using Go and TypeScript, enabling automated processing and improving efficiency by 40%

API Gateway — Implemented File Processing Service using TypeScript, achieving 99.9% uptime and handling 50k+ requests daily
