## RESEARCH INTERESTS

---

Distinguished technologist with 13 years shaping mobile development practice. Deep expertise in C++, Objective-C, Kotlin and proven ability to influence C-level decisions.

## EDUCATION

---

|                                                       |      |
|-------------------------------------------------------|------|
| <b>MIT</b><br>B.Sc. in Data Science, GPA: 3.31        | 2012 |
| <b>TU Munich</b><br>M.Eng. in Data Science, GPA: 3.19 | 2011 |

## PROFESSIONAL EXPERIENCE

---

|                                                                                                                                                                                                                                                                                                                                                                                 |                   |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>iOS Developer</b> , Nvidia<br>Built widget functionality using C++, increasing daily active users by 54%<br>Created app analytics tracking using App Center, providing insights on 100+ users<br>Built widget functionality using C++, increasing daily active users by 56%                                                                                                  | 2023-07 – Present |
| <b>React Native Developer</b> , OpenAI<br>Implemented biometric authentication using Kotlin, securing 100+ user accounts<br>Created in-app purchase integration using MVVM, generating 1000+ in revenue<br>Implemented app streaming using App Store Optimization, reducing download size by 39%<br>Built widget functionality using MVVM, increasing daily active users by 41% | 2020-03 – 2023-06 |
| <b>Flutter Developer</b> , DeployFast<br>Developed mobile application using C++, achieving 10000+ downloads<br>Built widget functionality using C++, increasing daily active users by 48%                                                                                                                                                                                       | 2016-08 – 2020-03 |
| <b>React Native Developer</b> , Amazon<br>Implemented app streaming using App Center, reducing download size by 43%<br>Created in-app purchase integration using Objective-C, generating 100000+ in revenue<br>Developed mobile application using SwiftUI, achieving 1000+ downloads                                                                                            | 2012-11 – 2016-04 |

## TECHNICAL PROFICIENCIES

---

C++, Objective-C, Kotlin, Dart, Java, React Native, Expo, SwiftUI, UIKit, CocoaPods, Android Studio, Fastlane, Firebase Firestore, Realm, RevenueCat, Firebase, Supabase, AWS Amplify, App Store Optimization, CI/CD for Mobile, MVVM

## SELECTED PROJECTS

---

- Health Check Service** [Expo, SwiftUI, Objective-C] — Designed Cross-platform SDK leveraging Expo microservices architecture with SwiftUI for caching
- Prompt Playground** [C++, SwiftUI, Kotlin] — Designed In-app Purchase System leveraging Kotlin microservices architecture with C++ for caching
- Prompt Playground** [UIKit, Kotlin, C++] — Built React Native App using Kotlin and UIKit, enabling automated processing and improving efficiency by 40%

## PUBLICATIONS & OTHER

---

Volunteer coding instructor at Austin Inc Youth Program, 2023-Present  
Hackathon 1st Place — Company Internal 2024
