About Me

Experienced software engineer with expertise in Scala, Go, and TensorFlow. Proven ability to lead technical initiatives and mentor junior team members.

Education

Ph.D. in Mathematics

2021

Imperial College London — GPA: 3.39

AI Research

Skills

Scala Go TensorFlow LightGBM Spark MLflow ChromaDB Databricks Azure ML Bedrock
Hugging Face Endpoints AWS SageMaker Computer Vision Feature Engineering Vector Databases
MLOps Fine-tuning

Internships / Experience

LLM Engineer at SkillBridge (2022-08 – Present)

Developed ML models using Redshift, improving prediction accuracy by 30%

Developed data visualization tools using Redshift, used by 100+ analysts

Developed data visualization tools using Redshift, used by 100000+ analysts

AI Engineer at Salesforce (2021-02 – 2022-02)

Designed data warehousing solution using Redshift, enabling analytics on 10000+ records

Built end-to-end ML pipeline using OpenCV, processing 50000+ samples daily
