| Implemented product analytics using Jira, tracking 100000+ metrics          |               |                   |
| Led product development using Scrum, launching features used by 1000+ users |               |                   |

## Education

---

|                                      |      |
|--------------------------------------|------|
| <b>B.Sc., Information Technology</b> | 2018 |
| University of Washington             |      |
| <b>B.Eng., Computer Science</b>      | 2014 |
| NUS                                  |      |

## Technical Skills

---

SQL, JavaScript, Python, Productboard, Aha!, Roadmunk, Zoom, Figma, BigQuery, PostgreSQL, MySQL, Snowflake, Azure, AWS, GCP, A/B Testing, Kanban, User Research, Scrum

## Projects

---

**Event Sourcing Engine** — Developed Product Documentation using Productboard, reducing processing time by 60% through algorithmic improvements

**ML Model Registry** — Created Product Backlog leveraging Python for core functionality and JavaScript for optimization

**Resume Parser** — Built Customer Feedback System with SQL and Python, serving 10,000+ daily active users

## Other

---

Personal\_statement: Passionate about accessibility and building technology that makes a difference.

Award: Best Paper Award — ACM 2023

Publication: "Must sound certainly camera member technology attention message would not east" — CVPR 2020
