

Connie Stevens

Lead Data Science / ML / AI | 9.7+ Years Experience

connie.stevens@gmail.com | (823)941-0346 | East Craig, Brazil

<https://linkedin.com/in/connie-stevens>

Executive Summary

Lead data science / ml / ai professional with 10 years driving technical strategy and team excellence. Expert in MATLAB, Scala, Julia with track record of building and scaling engineering teams.

Leadership Experience

Data Scientist 2024-12 – Present

Snowflake

Built ML model serving infrastructure using LangChain, handling 500+ predictions/day

Built real-time analytics dashboard using Scikit-learn, used by 500+ stakeholders

Data Analyst 2021-04 – 2024-09

Airbnb

Implemented NLP solution using Weights & Biases, processing 500+ text documents daily

Created feature engineering pipeline using GCP Vertex AI, reducing preprocessing time by 63%

Established MLOps practices using Weights & Biases, reducing model deployment time by 29%

Established MLOps practices using GCP Vertex AI, reducing model deployment time by 27%

Data Scientist 2017-04 – 2020-10

InfraCore

Implemented NLP solution using Scikit-learn, processing 100+ text documents daily

Designed data warehousing solution using LightGBM, enabling analytics on 10000+ records

AI Engineer 2015-09 – 2017-03

Notion

Built real-time analytics dashboard using Qdrant, used by 5000+ stakeholders

Developed ML models using Qdrant, improving prediction accuracy by 22%

Established MLOps practices using Claude API, reducing model deployment time by 66%

Built end-to-end ML pipeline using BigQuery, processing 500+ samples daily

Education

B.Sc. in Artificial Intelligence — University of Washington, 2016

B.Tech. in Data Science — University of Waterloo, 2014

Key Skills

MATLAB | Scala | Julia | R | XGBoost | LangChain | JAX | PyTorch | NumPy | Spark | Kubeflow | BigQuery | ChromaDB | Snowflake | MongoDB | Qdrant | Bedrock | GCP Vertex AI | Hugging Face Endpoints | Feature Engineering | LLM Evaluation | Vector Databases
