About Me

Engineering leader with deep technical background in Ruby, Python, and JavaScript. 11 years of experience delivering enterprise-scale solutions.

Education

M.Eng. in Artificial Intelligence

2015

TU Munich

Research Assistant

M.Eng. in Data Science

2012

UC Berkeley — GPA: 2.84

Projects

API Gateway (2025)

Designed Accessibility Testing leveraging Python microservices architecture with Selenium for caching

Tech: JavaScript, Selenium, Python

Skills

Ruby Python JavaScript Cypress TestNG Playwright Selenium Appium Jira Git
PostgreSQL MongoDB MySQL Redis GCP Azure AWS Test Planning Test Automation
Agile Testing Performance Testing

Internships / Experience

Test Automation Engineer at Meta (2022-04 – Present)

Built mobile testing automation using Security Testing, testing on 1000+ devices

Created test reporting dashboard using GCP, tracking 100+ test metrics

Built security testing automation using GCP, finding 50000+ vulnerabilities

Implemented CI/CD testing using Performance Testing, catching 5000+ defects pre-production

QA Engineer at Confluent (2021-03 – 2021-10)

Created test data management using MongoDB, generating 1000+ test records

Developed API testing framework using Test Automation, testing 10000+ endpoints

QA Lead at HashiCorp (2018-08 – 2021-02)

Created test data management using SoapUI, generating 10000+ test records

Implemented CI/CD testing using SoapUI, catching 50000+ defects pre-production

Test Automation Engineer at VectorDB Inc (2016-06 – 2018-03)

Built mobile testing automation using Sauce Labs, testing on 50000+ devices

Built mobile testing automation using Jira, testing on 5000+ devices

Implemented shift-left testing using JavaScript, reducing bug escape rate by 63%
Created performance testing suite using SoapUI, identifying 500+ bottlenecks

QA Lead at CodeCraft Studios (2013-12 – 2016-04)

Built mobile testing automation using JUnit, testing on 100000+ devices
Created test reporting dashboard using JUnit, tracking 50000+ test metrics
